

ISO 27001

Bring your organisation up to an internationally recognised standard to keep your data safe.

About OmniCyber Security

At OmniCyber Security, we want to make watertight IT security and compliance accessible to every business. By sharing our knowledge of cyber security and rich industry experience, we help you to ensure your organisation is properly protected.

We offer a wide range of services to make your route to success as simple as possible. Our services include: CREST-accredited penetration testing, PCI DSS compliance, ISO27001 consultancy, and other INFOSEC services.

We're a boutique company, passionate about helping others. Our expert, friendly team are always on hand to offer advice and devise tailored solutions that meet your organisation's unique needs.

What is ISO 27001?

The ISO 27001 Standard is an international standard for cyber security recognised across the globe. By maintaining ISO 27001, you will make sure you have a high-performing information security management system (ISMS) with an approved framework for the protection of sensitive data.

Suitable for organisations of any size and industry, an ISO 27001 certification provides valuable, visible proof your organisation has taken comprehensive action on data security by complying with an international standard recognised worldwide.

Overview of ISO 27001 Certification Project

Project timeline:
5 - 12 months

Our ISO 27001 Services

Service	Description
ISO 27001 Certification Health Check	A short test to assess your organisation's readiness for a certification audit.
ISMS Scoping	We will review your requirements and ensure your most important business operations and assets are included in the test. We will also help you to achieve certification in a timely and efficient manner.
ISO 27001 Gap Analysis	<p>We will assess your security efforts to identify the gaps in your Information Security Management System (ISMS) as well as your ISO 27001 Annex A control areas.</p> <p>We will develop a project roadmap for ISO 27001 compliance based on all the above. The project roadmap will include gap analysis recommendations, costs, and a high-level project plan.</p>
Security Awareness	We will help you to develop the robust security awareness and training program required under the standard.
Internal Audit	Internal audit is a mandatory step in your certification journey. We will conduct the internal audit for you and produce a detailed report, highlighting areas to be remediated before the certification audit.
Certification Audit Support	Our expert consultants are on hand to support you during the certification audit.
Full Implementation	We will work with you to provide a complete end-to-end service to ensure you complete certification. This service includes all elements listed.

Is ISO 27001 For You?

Achieving ISO 27001 is an excellent way to show customers, clients and partners you take information security seriously.

Minimise Your Risks

ISO 27001 ensures the right controls are in place to reduce the risk of an information security breach and avoid the exploitation of any system weaknesses.

Implement Best Practice

ISO 27001 gives you confidence you have addressed all security risks to your business including IT, people, physical threats and business continuity.

Gain a Competitive Edge

Certification sends out a message about your capabilities as an organisation to keep data safe. It will mark you out as a trusted and responsible supplier, giving you an edge over your competition.

Reduce Costs

Whilst completing the standard you will need to carry out methodical risk assessments which will ensure resources are effectively deployed to reduce risk and cut operational costs.

Improve Business Structures

The ISO 27001 standard will make information risk responsibilities clear, so everyone knows who is accountable and actions are taken in a more productive, timely manner.

Avoid Financial Losses

As the accepted global benchmark for the effective management of information assets, ISO 27001 means organisations can mitigate the potentially devastating financial losses caused by data breaches.
